It is doubtful whether the Sp. word is a transferred application (which, indeed, would be difficult to account for) of a Sp. representation of L. *saxifraga* SAXIFRAGE, or whether it was adopted from some American language; in the latter case the American word seems to have influenced the form of the Sp. name for saxifrage, which according to the native lexicographers has the forms *saxifraga, fragia, fragua, salsifragia, salsifrex, saxafrax*. The Spanish writer Monardes (1571) regards the Sp. name as adopted from Fr., which seems unlikely; he gives the native Indian name as *pauame*.]

Satan (sē·tăn). Also 3–5 **saton,** 5 **satone**; 3–7 **sathan,** 4, 6 **sathane,** 5 **sathon**(e. [a. L. *Satān* (Vulg., only in the O. T.) = Gr. Σατάν or Σατᾶν (once in the LXX and once in the N. T.), a. Heb. שָׂטָן *śāṭān* adversary, one who plots against another, f. *śāṭan* to oppose, plot against.

In the Old Testament the Heb. word ordinarily denotes a human adversary, but in some of the later portions (Job, Chron., Zech., Ps. cix) it occurs (chiefly with definite article) as the designation of an angelic being hostile to mankind, who tempts men to evil and accuses them to God. In both applications the ordinary rendering of the LXX is διάβολος slanderer (see Devil *sb.*); the more accurate ἐπίβουλος (plotter) occurs once; the one instance in which the Heb. word is retained (1 Kings xi 14) relates clearly to a human enemy, but may have been misapprehended. In the Gr. N. T. the ordinary form is Σατανᾶς (once only Σατᾶν), which is followed by the Vulgate and hence by Wyclif (see Satanas); but the English versions from Tindale onwards (including the Rheims N. T.) all substitute the Heb. form *Satan*. Cf. OF. *Sathan, Satan*, Fr., Sp., It., G. *Satan*

The pronunciation (sē·tăn), which is mentioned disapprovingly by Walker (1828), and is ignored in later Dictionaries, is still not uncommon in British liturgical and pulpit use.]

Satire (sæ·tɔi(ə)). Also 6–8 **satyre,** 7–8 **satyr,** 8 **satir.** [a. F. *satire* (= Sp. *sátira*, Pg., It. *satira*, G. *satire*), or directly ad. L. *satira*, later form of *satura*, in early use a discursive composition in verse treating of a variety of subjects, in classical use a poem in which prevalent follies or vices are assailed with ridicule or with serious denunciation. The word is a specific application of *satura* medley; this general sense appears in the phrase *per saturam* in the lump, indiscriminately; according to the grammarians this is elliptical for *lanx satura* (lit. 'full dish': *lanx* dish, *satura*, fem. of *satur* full, related to *satis* enough), which is alleged to have been used for a dish containing various kinds of fruit, and for food composed of many different ingredients.

Formerly often confused or associated with Satyr (see esp. sense 4), from the common notion (found already in some ancient grammarians) that L. *satira* was derived from the Gr. σατυρος satyr, in allusion to the chorus of satyrs which gave its name to the Greek 'satyric' drama. The words *satire* and *satyr* were probably at one time pronounced alike, as the derivatives *satiric* and *satyric* are still; and the common use of *y* and *i* as interchangeable symbols in the 16th and 17th c. still further contributed to the confusion.]

I. 1. A poem, or in modern use sometimes a prose composition, in which prevailing vices or follies are held up to ridicule. Sometimes, less correctly, applied to a composition in verse or prose intended to ridicule a particular person or class of persons, a lampoon.

Also used *Hist.* as the rendering of L. *satura* in its pre-classical sense of a poetic 'medley': see the etymological note above.

1. *Myth.* One of a class of woodland gods or demons, in form partly human and partly bestial, supposed to be the companions of Bacchus.

In Greek art of the pre-Roman period the satyr was represented with the ears and tail of a horse. Roman sculptors assimilated it in some degree to the faun of their native mythology, giving to it the ears, tail, and legs of a goat, and budding horns.

In the English Bible the word is applied (without precedent either in the LXX or the Vulgate) to the hairy demons or monsters (Heb. שְׂעִירִים *śe'irim*) of Semitic superstition, supposed to inhabit deserts.

Saunter (*sō·ntəɹ*), *v.* Also 5–8 santer, (7 sawnter, *dial.* sonter). [Of obscure origin.

The current suggestion that the word is a. In the original use, a quantity of finely chopped pork, beef, or other meat, spiced and flavoured, enclosed in a short length of the intestine of some animal, so as to form a cylindrical roll (usually, one of the 'links' formed by tying the containing intestine at regular intervals); later also, in generalized sense, meat thus prepared. In the 19th c. the application of the word has been greatly extended; in its widest use, it denotes a preparation of comminuted beef, veal, pork, mutton, or a mixture of these, either fresh, salted, pickled, smoked or cured, with salt, spices, flour (sometimes with the addition of fats, blood, sugar, vegetables, etc.), stuffed into a container made from an intestine, stomach, bladder, or other animal tissue.

There are more than 150 kinds of sausage, distinguished by names indicating the ingredients and the method of

manufacture. They are divided into two classes, in the U. S. known as *dry sausage*, which is a cured product, subjected to a process of drying lasting several weeks, and *fresh* or *wet sausage*.

Save (sēv), *quasi-prep.* and *conj.* Forms: *α.* 3–5 **sauf**, 5–6 **saufe**, 5 **sawf**, **sauff**, **saauf**; 3–5 **saf**, 4–5 **safe**, **saaf**, 4–6 **saff(e**, 5 **sef**; 5–6 **salf**, 6 **salfe**, **saulfe**; 5–6 *Sc.* **saif(f.** *β.* 3–4 **sauue**, 4 **sawve**, 5 **sawe**, 4–6 **salve**, 4– **save.** [Developed from SAFE *a.* 5, in imitation of the similar development in the use of the equivalent F. *sauf.*

Already in OF. the adj. *sauf*, fem. *sauve*, prefixed to a sb. in the absolute construction (= L. *salvō, salvā*: see SAFE *a.* 5) had often the sense 'being excepted', so that it became (like the analogous *excepté* ppl. adj. in Eng.) functionally equivalent to a prep., and was eventually treated as such, the masc. form *sauf* being used even before a fem. sb. Cf. Sp. *salvo*, Pr. *sal.*

The *β* forms may partly represent the OF. *sauve* in collocation with a fem. sb., and partly the ME. form of the plural adj. But the later exclusive use of the form *save* is probably due to the identification of the word with the imperative of the vb: cf. *except*, which appears to have been similarly apprehended as an imperative.

The use of a nominative after *save* (see 1 b) may perhaps be a trace of the originally adjectival character of the word; it is, however, to be noted that the same thing occurs with all the quasi-prepositional words of the same meaning, including even *saving* and *excepting*, which are in origin pr. pples. of transitive verbs.]

The existence of these forms suggests that the ME. *saverey* may be an adoption of an unrecorded OF. form which had the *v* either as a phonetic development in hiatus (cf. F. *pouvoir* for early OF. *pooir*) or through the influence of *saveur* Savour.

OE. *seax* (:—**sahso-*) knife, SAX, f. pre-Teut. root **sok-*: **sek-* to cut; cf. L. *secāre* to cut.]

1. A cutting tool consisting of a plate (or, in some forms, a band or a tube) of metal (usually steel), one edge of which is formed into a continuous series of teeth. (Some saws for cutting stone are without teeth.) In the original form of the tool, represented by the HAND-SAW, and in some varieties of more modern invention, e. g. the pit-saw (see PIT *sb.*1 14), the saw is moved backwards and forwards, each movement in one direction deepening the groove or 'kerf' made in the wood or other material to be cut. In other varieties, as the circular saw and the band-saw, a continuous movement in one direction is substituted for the reciprocating movement.

Ordinarily *saw* means the complete instrument including the handle, frame, or the like, necessary to fit it for use; but sometimes the word is applied to the 'saw-plate' or 'saw-blade' alone.

Also with defining words, indicating special varieties of form, structure, mode of operation, or purpose, as in *band saw*, *circular saw*, *compass saw*, *drag saw*, *endless saw*, *frame saw*, *fret saw*, *gate saw*, *hand saw*, *ice saw*, *joint saw*, *keyhole saw*, *lock saw*, *meat saw*, *mill saw*, *panel saw*, *pit saw*, *rabbet saw*, *rip saw*, *sash saw*, *tenon saw*, *web saw*. These terms, so far as they have been thought to require notice in this Dictionary, are treated either under their first element or as main words. A considerable number of kinds of saws used for surgical purposes are distinguished by the names of their inventors, as *Butcher's*, *Ferguson's*, *Gowan's*, *Hey's*, *Liston's saw*.

Say (sē[1]), *v.*[1] Forms: see below. [OE. *sęcgan*, pa. t. *sægde*, corresp. to OFris. *sega, sedza* (mod. Fris. *sizze*), OS. *seggian*, pa. t. *sagda* (MLG. *seggen*, MDu. *seggen, sayen*, Du. *zeggen*), OHG. *sagēn*, pa. t. *sagita, segita* (MHG., mod.G. *sagen*), ON. *segja*, pa. t. *sagða*; repr. OTeut. **sogējan, *sagjan* :—pre-Teut. **sokēi-*. The root is perh. WIndo-germanic **soq*ᵘ-: **seq*ᵘ, found in Lith. *sakýti*, OSl. *sočytĭ* to say, Gr. ἔννεπε imper. (:—**en-seq*ᵘ*-e* = OLatin *inseque, insece*), ἐνισπεῖν aorist inf., to tell, say, L. *inquam* I say (:—**in-squ-am*).

The normal mod.Eng. phonetic representative of the OE. inf. *sęcgan* (or the 1st sing. pres. *sęcge*) would have been **sedge*. As in the case of BUY *v.*, LIE *v.*[1], the mod. form comes from OE. forms which had *ǧ* (palatal) instead of *cg*, as imp. *sęge, sæge*, and sing. pres. ind. *sęgest, sægst*, 3rd sing. pres. ind. *sęgeð, sægð*. The *g* represents WGer. *g*, and the *cg* WGer. *gg*; the OTeut. stem **sagi-* having become by phonetic law in W.Ger. **saggi-* before an inflexional suffix beginning with a vowel, and **sagi-* in any other position. In Middle English, alongside the tendency, which ultimately prevailed, to extend the stem *seȝ-, sei-, sai-* (:—OE. *sęg-*) to all parts of the verb, there existed an opposite tendency to extend the stem *segg-* beyond its etymological limits. Hence most of the parts of the verb (though not the pa. t.) had two widely divergent forms, the distribution of which does not closely correspond to dialectal divisions. In some northern poetry the two forms occasionally occur in juxtaposition as distinct words (e. g. 'Tille I haue seggid and saide all my sawe', *York Myst.* XXXII 16). In Robert of Brunne the form *seege*, **sedge* (implied in *sedgeyng*) seems to be appropriated to the sense 'recite' (as a minstrel): see SAYER 1, SAYING 1.]

B. Signification.

In Eng., as in other Teut. langs., *say* is an approximate synonym of *speak*, from which it differs in having normally as its object a particular word or series of words, or a sentence representing the meaning of a particular series of words. Cf. L. *dicere* and its representatives in Romanic (which, however, have also senses that are now expressed in Eng. by *tell*), and L. *aio, inquam*.

As the word designates not the action of speaking itself, but its relation to the object, its use with reference to written expression does not ordinarily, like the similar use of *speak*, involve any consciousness of metaphor.

1. *trans.* To utter or pronounce (a specified word or words, or an articulate sound). Also, in wider sense, used of an author or a book, with quoted words as object.

For various idiomatic collocations, as *to say nay, to say bo, to say farewell*, etc, see the conjoined words.

For *as who saith, as who should say*, see As and Who.

9. To recite or repeat (something that has a prescribed form); occas. to recite from memory, in contradistinction to reading. Often in traditional collocations, as *to say grace, a lesson,* (*a*) *mass, a prayer,* (*one's prayers*).

In ritual use *say* and *sing* are sometimes equivalent; but *say* is the wider term, and seems often to have been applied distinctively to recitation without note.

10. On the analogy of expressions like 'let us say', 'shall we say?', etc. (referable to senses 1–3), where the verb has contextually the sense of 'suppose', 'assume', the imperative *say* is idiomatically used: **a.** to introduce a clause, with the sense 'supposing', 'on the assumption *that*'; **b.** parenthetically, to indicate that a preceding sentence expresses a supposition or a selected instance; **c.** prefixed to a designation of number, quantity, date, etc. to mark it as an approximate guess or as representing a hypothetical case.

In commercial documents *say* is also used, without any implication of inexactness, to introduce any varied repetition of a numerical or quantitative statement: e.g., 'a shipment of 215 (say two hundred and fifteen) tons of coal'; 'thirteen stones (say 182 pounds)'; 'four editions of 5000 copies each,

or say in all 8000 copies'. Cf. Ger. *sage*, Da. *siger*, Sw. *säger*; the two last are indicative present, either 1st or 3rd pers. sing.; Du. has *segge* (old form of *seg*, 1st pers.), and Fr. has *je dis* similarly used.

Scab (skæb), *sb.* Forms: 4–6 **scabbe,** 4–7 **skab,** 5–6 **skabbe,** 6 **skabe, scappe,** 6–7 **scabb,** 3– **scab.** [a. ON. **skabb-r* (MSw. *skabb-er*, mod. Sw. *skabb*, Da. *skab* from the 13th c.), corresponding to OE. *sceabb* Shab *sb.*, q.v. for cognate forms. With sense 4 cf. MDu. *schabbe*, applied to women with the senses 'slut' and 'scold'; possibly this word, used by foreign vagrants, may have helped the development of the sense in Eng.; its etymological relation to early mod.Du. *schabbe* (Kilian), Flem. dial. *schab* itch (= OE. *sceabb*) is not clear.

The occurrence of the word in Kentish of the 13th c. is a difficulty, as the Scandinavian form would be unlikely to be adopted in that dialect. Perh. the word may in this passage represent the OE *sceabb*, with archaizing spelling due to the influence of the L. *scabies*, which it here renders (cf. Lev. xlii. 6, Vulgate). Association with the Latin word of similar sound has influenced the later medical use.]

Evidence of the existence of the word in continental OF. has not yet been found, as J. de Garlandia, though resident in France, was an Englishman. The form represents an earlier **scalberc, -berge*, which must be an adoption of a Teut. compound, the last element of which contains the root **berg-* to protect (cf. Hauberk). No such Teut. compound has, however, been found. As to the origin of the first element two suggestions have been made: (1) that it is OHG. *scala* shell, husk, which does not yield a very satisfactory sense; (2) that **scalberc* is altered by dissimilation from **scarberc*, from OHG. *scar, scarn*, ordinarily meaning 'scissors', but occas. used as a designation for a sword. The Icel. *skilf-r* scabbard, *skálm* short sword (? a. Gr. σκάλμη), *skálm* 'one part of a cloven thing' (Vigf.), pl. bean-pods, have some resemblance in form and sense, but the possibility of etymological connexion is very doubtful.]

For the OE. *scealu* the inflexion appears to attest the short vowel in all the senses. The WGer. **skâla* (:—OTeut. **skēlā*, *skalā*) passed into OF. as *eschale*, *escale* cup (med.L. *scala* 'patera'), also husk (mod.F. *écale*). Between the first quarter of the 13th c. and the 16th c. the α forms (containing the vowel *a*) represent the northern pronunciation, the β forms being midland and southern. In the 16th c., however, the northern *scale* seems to have found its way into the London dialect, being used by Palsgrave and later by Spenser and Shaks. In the 17th c. *scale* is the prevailing literary form, though *scole* (with other equivalent spellings) occasionally appears down to the middle of the century.]

Scapegoat (skēi·pgōut). [f. Scape *sb.*[1] or *v.*[1] + Goat.

App. invented by Tindale (1530) to express what he believed to be the literal meaning of Heb. שלח עזאזל, occurring only in Lev. xvi. 8, 10, 26. The same interpretation is expressed by the Vulgate *caper emissarius* (whence the Fr. *bouc émissaire*), and by Coverdale's (1545) rendering 'the fre goate', but is now regarded as untenable. The word does not appear in the Revised Version of 1884, which has 'Azazel' (as a proper name) in the text, and 'dismissal' in the margin as an alternative rendering.]

1. (As proper name, with capital S.) A stock character in Italian farce, a cowardly and foolish boaster of his own prowess, who is constantly being cudgelled by Harlequin.

The character was intended in ridicule of the Spanish don, and was dressed in Spanish costume, usually black; the costume was often adopted in masquerades.

The clever impersonation of the part by Tiberio Fiurelli, who brought his company of Italian players to London in 1673, rendered the word very popular in England during the last quarter of the 17th c.

2. Originally used to express a restrictive qualification, = 'barely', 'only just'; hence also, = 'barely, or not quite', 'only just, if at all'. In mod. use the original sense survives only in definite statements of fact. In sentences relating to belief, expectation, or estimation, the word now (as occas. in ME.) serves as a restricted negative (= 'not quite'). Often, however, the qualification really relates, not to the contents of the sentence in which the adv. occurs, but to the degree of the speaker's belief: thus 'You will scarcely maintain this proposition' is equivalent to 'I cannot quite believe that you will maintain', etc. Cf. Scarce *adv.* and Hardly *adv.*

The adv qualifies verbs, adjs., advs., and advb. phrases, and esp numerals (sbs., adjs., and advs.), designations of quantity, and indefinite pronouns. In many cases it may most correctly be regarded as qualifying the whole predication, though placed in proximity to the word in the sentence to which the qualification chiefly relates.

Scarf (skāɹf), *sb.*[1] Pl. **scarfs, scarves.** Forms: 6-7 **scarfe, scarff(e, scarph(e, skarf(e,** 7 **skarffe,** 6- **scarf.** [Of obscure history; not recorded before the middle of the 16th c., but prob. a. ONF. *escarpe* = Central OF. *escharpe*, mod.F. *écharpe* sash, sling for a wounded arm, etc. (whence It. *sciarpa, ciarpa*, Sp. *charpa*, G. *schärpe*, MDu. *scharpe*, and mod.Du. *sjerp*), prob. the same word as OF *escharpe, escarpe, esquerpe, escreppe*, etc., a pilgrim's scrip suspended from the neck; of Teut. origin: cf. ON. *skreppa* SCRIP *sb.*[1]

The more normal form *scarp* is found (almost as early as *scarf*) in the heraldic sense 5 a; possibly, though unrecorded, it may have been the original Eng. form in all senses. It is noteworthy that all the words of the form *scarp* have variants with *f*: for the change of final *p* into *f* after liquids cf. SCALP *sb.*[2] Various Ger. dialects have *scherfe, scharfe* (whence Russian шарфъ) for the literary Ger. *schärpe*, but this coincidence with Eng. seems to be merely accidental.

The original plural form *scarfs* has never gone out of use; but from the beginning of the 18th c. the form *scarves* (on the analogy of *halves*, etc.) has been common, and in London commercial use it appears to have become universal. No other sb. of other than native origin has this change of *f* into *v* in the plural.]

Scarf (skāɹf), *sb.*[2] Also 5 **scarffe,** 6 **skarfe,** 8 **soarfe,** 8–9 **soarph,** 9 **skerf.** [Words of related form and identical meaning (chiefly belonging to the nautical vocabulary) are found in several mod. langs., but recorded much later than in English: F. *écart* (:—**escarf*) a scarf, vbl. noun from *écarver* (:—**escarver*) to scarf; Sp. *escarba*, Pg. *escarva* a scarf; Du. *scherf* a scarf, *verscherven* (whence G. *verscherben*) to scarf; Sw. *skarf*, Norw. *skarv* piece added to lengthen a board or a garment, also the joint or seam by which this is effected; Sw. *skarfva*, Norw. *skarva, skjerva* to lengthen by joining or sewing on an additional piece (Da. has in this sense *skarre*, the relation of which to the Sw. form is obscure).

The relation of these words to each other and to the English sb. and vb. is uncertain. The fact that the Sw. words are not, like those in the other langs., exclusively technical, but have a wider meaning, seems to afford a slight presumption in favour of Scandinavian as the ultimate source. But even assuming this, it remains doubtful whether the Eng. sb. comes from Sw. (or some other Scandinavian dialect) directly or through the medium of OF. **escarf.*

The Sw. *skarf* has commonly been referred to the Teut. root **skerb-, skarb-*, represented by OE. *scearfian* (= OHG. *scarpôn*, G. *scharben*) to cut into shreds, OE. *sceorfan* str. vb., to gnaw, bite, scarify, Du. *scherf* (= OHG. *scirbî*, G. *scherbe*) potsherd; but affinity in meaning seems wanting.]

Scarlet (skā··lĕt), *sb.* and *a.* Forms: 3–7 **scarlat, skarlet,** 4 **scarleit, scharlette,** 4–6, 8 **scarlett,** 5 **scarlatte, scarlad, skarlot,** 5–6 **scarlot, skarlat,** 5, 8 **skarlett,** 6 **scarlette, skarlette, skarlote, skerlyt,** 3– **scarlet.** [Aphetic a. OF. *escarlate* sb. fem. (mod.F. *écarlate*) = Pr. *escarlat* masc., *-ata* fem. In Fr. and Pr. recorded from the 12th c.; the other Rom. forms are later: Sp., Pg. *escarlate, -ata*, It. *scarlatto*, med.L. *scarlat-(t)um, -a, scarlettum* (1204 in *Excerpta Historica* 393). In Teut. the word appears as ON. *skarlat, skallat*, MHG. *scharlât*, early mod.Flem. *schaerlat*; also, with etymologizing alteration (cf. LAKE *sb.*5), MHG. *scharlach(en*, MLG., Du. *scharlaken* (whence Da. *skarlagen*, Sw. *skarlakan*, Icel. *skarlak, skarlakan*). From It. are prob. mod. Gr. *σκαρλάτον*, Church Slav. *skrŭllato*, Serbian *skrlet*, Turk. *iskerlet.*

If the OHG. *scarlakhan*, in a gloss explained as 'shorn cloth' (*rasilis*) be identical with this word (the interpretation as well as the form being due to popular etymology), it is the earliest evidence of its existence. It is hardly possible that this OHG. word can be the source of the Rom. forms. The prevailing view is that OF. *escarlate* is an alteration of Pers. سقلاط *saqalāt, siqalāt, suqlāt*, a kind of rich cloth, a derivative of which appears as CICLATOUN. (The form سقرلاط *saqirlāt*, given in some Arabic dictionaries, is modern and prob. adopted from some European language.)]

A. *sb.*

1. † a. In early use, some rich cloth, often of a bright red colour, but (according to Fr., MDu., and med.L. sources) also sometimes of other colours, as 'pers', blue, green, brown. *Obs.* b. In later use, cloth or clothing of the colour described in 2.

† *Scarlet in grain* (*s. engreyned, grayned s.*, etc.): cloth fast dyed of a scarlet colour (cf. GRAIN *sb.*1 10 and INGRAIN *a.*). It is doubtful whether 'scarlet and grene', frequently occurring in ME. poetry in descriptions of splendid attire, originated in a misunderstanding of this phrase.

Scatter (skæ·təɹ), *sb.* [f. Scatter *v.*]

1. The action or an act of scattering; wide or irregular distribution; dispersion. Now chiefly with reference to shot.

1642 J. W[eall] *Prepar. Fast* 4 We are exposed aswell to Forraigne and intestine mischiefes. This divide and scatter, if it be not prevented, will be no small curse. 1650 T. 2. A small quantity loosely distributed or interspersed; a scattering, sprinkling. *rare.*

Scatter (skæ·təɹ), *v.* Forms: 2 **scatere**, 3–6 **scater**, **skater**, 4 **schatre**, **scatir(e**, 4–5 **scatre**, 5 **skatre**, (**schatir**), 6 **scattre**, **skattir**, **sketer**, 7 **skatter**, 6– **scatter**. [Early ME. (12th c., Mid-

land); of obscure origin; formed with iterative suffix (see -ER 5).

This and SHATTER *v.* (which appears much later) are commonly regarded as respectively northern and southern representatives of an OE. **sc(e)aterian*, which is referred to a supposed Teut. root **skat-* cogn. w. Gr. σκαδ-αννύναι to scatter. The etymological identity of the two vbs. seems, however, doubtful, although they have some affinity of sense. It is true that in ME. *scatter* occurs only in northern and midland texts, with one exception (quot. 1330, sense 3); and that in this sole southern instance the MS. spells it with *sch*, which should normally stand for (ʃ). But initial (sk) from OE. *sc* in a native word would be no less abnormal in northern and midland than in southern English. The alleged cognates in Du. and LG. are questionable. Two instances are cited of MDu. *schaderen*, with the senses 'to squander (money)', 'to shed (blood)'; but this does not agree in form. The sense 'to scatter' assigned to early mod.Du. *schetteren*, rests on the authority of Kilian, whose citation of the Eng word renders his testimony suspicious. The Du. and MLG. *schateren* to resound, to laugh uproariously (MLG. once, to be shattered by an explosion) would seem to be onomatopoeic; at least their sense cannot easily be derived from that assigned to the alleged Teut. root. Cf. SCAT *v.*[3] and SQUATTER *v.*]

In editions of the Roman dramatists, and of the French classic dramatists, the entrance or exit of any actor makes a new numbered 'scene'. In the English drama, on the other hand, the 'scene' is a distinct subdivision of the act, marked by the fall of the curtain or the leaving of the stage empty; even when the *local* and the actors remain the same in two consecutive 'scenes', the stage is not supposed to have been occupied continuously through the interval.

6. The material apparatus, consisting chiefly of painted hangings, slides, etc., set at the back and sides of the stage, and intended to give the illusion of a real view of the *local* in which the action of a play takes place; the view thus presented to the spectators at any time during the action of a play. Also, any one of the painted hangings, slides, etc. used for this purpose.

On the Elizabethan stage, the curtain or hanging at the back of the stage, concealing the vestry or green-room, stood in lieu of scenery. Painted scenes and elaborate machinery, the representation of buildings or landscape in perspective, etc., were a principal feature of the privately-produced masques of Jas. I and Chas. I and, later, of the operatic play (see OPERA 1).

Sch. This sequence of letters corresponds in present or past English spelling to the various sounds or combinations of sounds ʃ, tʃ, sk, s, stʃ.

In ME. it was one of several modes of expressing the sound (ʃ), represented in OE. by *sc*, and in mod.E. normally by *sh*. With this value it continued to be used in Sc. down to the beginning of the 17th c. In ME. *sch* was sometimes miswritten for *ch*, pronounced (tʃ). In this Dictionary the words occurring in early texts spelt with initial *sch* which are not entered with this spelling will ordinarily be found under *sh* or *ch*.

In modern spelling *sch* has the value (ʃ) only in a few alien words from German (e.g. *schnapps*), in *schist* (of Gr. origin, influenced in pronunciation by German) and its derivatives, and in the abnormal (British) pronunciation of *schedule*. Formerly *sch* was often used for (ʃ), after German and French example, in transliterations of Oriental words, as in *schekinah*, *schah*, *haschisch*; but in these *sh* is now almost universally used instead.

In mod.E. (sk) is the normal pronunciation of *sch* in words of classical derivation, where it represents L. *sch*, Gr. σχ. (The only exceptions are *schist* etc. and *schedule*, mentioned above, and *schism* etc. for which see below.) *Sch* is also pronounced (sk) in Italian words, e.g. *scherzo*. In Du. words the native pronunciation of *sch* is (sχ) initially and (s) finally; but in the few Du. words with initial *sch* that are used in English without change of spelling the English custom is to substitute (sk).

In ME. texts initial *sch* sometimes occurs where the alliteration or the etymology shows that it is to be pronounced (sk). This probably arose from the fact that many Teut. words existed in two dialectal forms, one from OE. with (ʃ), and the other from ON. with (sk), and as both forms were used by the West Midland and Northern alliterative poets, they were often confused by the scribes. The existence of etymological spellings like *schole* for *scole* (SCHOOL *sb.*[1]), which occur sporadically from the 13th c., may have had some effect in suggesting the use of *sch* as a symbol for (sk).

The only words in which *sch* now represents (s) are *schism* and its derivatives, the pronunciation of the ME. form *cisme* (from OF. *cisme*) having survived although the spelling has been altered in accordance with the ultimate etymology. A similar explanation applies to the now obsolete pronunciation of *schedule* as (se·dɪul).

The pronunciation of *sch* as (stʃ) occurs only medially in words like *escheat*, *eschew*, *discharge*, where the *s* and the *ch* belong to different syllables.

Schedulate (ʃe·dɪulēt), *a. rare*⁻¹. [ad. mod.L. **schedulāt-us*, f. *schedula*: see next and -ATE².] Specified in a schedule; scheduled.

1811 W. SCOTT in *Dodson's Rep.* (1815) I. 39 Mr. Hansen has, by his act in paying the wages schedulate, waved all objection to the informality of the proceedings.

Schedule (ʃe·dɪul, ʃe·dəl; *U. OF. *cedule* (mod.F. *cédule*), ad. late L. *scedula* (in med. and mod.Latin also written *schedula*), dim. of L. *sceda* (med.L. also *scheda*): see SCEDE, SCHEDE *sbs.* The word has passed from Latin into most of the Rom. and Teut. langs.: Pr. *cedula, cedola*, Sp. *cédula*, Pg. *cedula*, It. *cedola*; MHG. *zedele, zetele* (mod.G. *zettel*), MLG. *sedele*, MDu. *cedule, cedele* (Du. *cedel, ceet*), Sw. *sedel*, Da. *seddel*, Icel. *sebill.*

In the 16th c., both in Fr. and Eng., the spellings *scedule* and *schedule*, imitating the contemporary forms of the Latin word, were used by a few writers. In Fr. this fashion was transient, but in Eng. *schedule* has been the regular spelling from the middle of the 17th c. The original pronunciation (se·dɪul) continued in use long after the change in spelling; it is given in 1791 by Walker without alternative; in his second ed. (1797) he says that it is 'too firmly fixed by custom to be altered', though on theoretical grounds he would prefer either (ske·dɪul), favoured by Kenrick, Perry, and Buchanan, or—'it we follow the French'—(ʃe·dɪul). The latter he does not seem to have known either in actual use or as recommended by any orthoepist. Smart, however, in 1836 gives (ʃe·dɪul) in the body of his Dictionary without alternative, although in his introduction he says that as the word is of Gr. origin the normal pronunciation would be with (sk). Several later Dicts. recognize (se·dɪul) as permissible, but it is doubtful whether this was really justified by usage. In England the universal pronunciation at present seems to be with (ʃ); in the U.S., the authority of Webster has secured general currency for (sk).]

2. *Eccl.* A breach of the unity of the visible Church; the division, either of the whole Church or of some portion of it, into separate and mutually hostile organizations; the condition of being so divided, or an instance of this. Also *transf.* with reference to other religious communities.

According to the definition given repeatedly in various forms by Augustine and other Fathers, the term has reference to outward separation, not to inward divergence of belief. Hence a 'schism' does not necessarily proceed from heresy; indeed the most prominent application of the word is to separations caused by disputes on matters of discipline, the validity of an election to a bishopric or of a sentence of deprivation, or the like.

Gr. *σχιστός* (*σχ. λίθος*, 'probably talc', L. & Sc.), f. *σχιδ-, σχίζειν* to split: see Schism *sb.*] A crystalline rock whose component minerals are arranged in a more or less parallel manner.

Some continental writers call any fissile rock a 'schist', prefixing the word 'crystalline' to denote the rocks described in the above definition. The parallel structure in schists is independent of original stratification, being due to metamorphic action; indeed, many schists are modified igneous rocks.

[OE. *scól* str. fem., a. L. *schola* (in Rom. pronunciation *scōla*) school, a. Gr. σχολή, orig. leisure, hence employment of leisure, study, and (in later use) a school. An OE. form *scolu* occurs once in the *OE. Chron.* (Parker MS.) an. 816. It is doubtful whether this is to be read as *scólu*, with irregular *u* due to some analogy, or as *scólu*, which might be an adoption of L. *schóla* with original short vowel (perhaps from the pronunciation of Britons: cf. Ælfric *Gramm.*, Præfatio). The OE. *scoln* troop (see SHOAL) which is often confused with this word, is certainly unconnected.

The curious 14th c. form *cole* is perh. aphetic from OF. *escole.*]

j. **High school.** A designation applied (with some variety of use) to certain classes of schools for secondary education in the British Islands and the United States. Also *attrib.*

The first school known to have been so designated in Great Britain is that established in Edinburgh in 1519. In the year of its foundation this is referred to in the records of the Town Council as 'the principale schule' and 'the principall gramer schule', and it had by municipal enactment the exclusive privilege of teaching the higher branches of school learning within the burgh. In 1532 it is mentioned as 'the hie schule' (see below); this appellation occurs frequently in the 16th c., and from the 17th c. onwards has continued to be the official name of the institution. About the middle of the 19th c. the name of 'High School' was given, in imitation of the example of Edinburgh, to the principal secondary school in many Scottish burghs; these schools having been for the most part either founded or reconstituted about that time. In the United States, the term seems to have come into use about 1824, and is applied to a class of schools to which pupils are admitted when they have completed their course in the elementary school, and which afford preparation for the college, the university, or the technical school. In England, when used without qualification, the designation 'High School' is understood to refer to the schools established and managed by the Girls' Public Day-school Company (founded 1874) and to some other schools similar to these in the method and character of the instruction given. The few schools for boys in England that are known as 'High Schools' are chiefly of recent foundation. While a 'high school' in the American sense of the term gives advanced instruction only, the schools so designated in Britain usually include elementary classes.

School board. [Board *sb.* 8 b.] In England and Wales from 1870 to 1902, and in Scotland since 1872, a body of persons elected by the ratepayers of a 'school district', and charged by statute with the provision and maintenance of sufficient accommodation in public elementary schools for all the children of the district.

In England school boards were established only in districts in which either a majority of the ratepayers approved, or the existing accommodation in public elementary schools was considered by the Education Department to be insufficient. The Education Act of 1902 abolished school boards in England, and transferred their duties and powers to the County Councils.

In Scotland there is a school board in every school district (which is usually either a burgh or a parish). By the Act of 1872 the control of the burgh and parish schools established by previous Acts, was vested in the school boards, which are also required to establish and maintain such additional schools as may be needed.

1870 *Act* 33 & 34 *Vict.* c. 75 § 10 If..the Education Department are satisfied that all the public school accommodation required..has not been so supplied .the Education Department shall cause a school board to be formed for the district. 1872 *Act* 35 & 36 *Vict.* c. 62 § 8 A school board shall be elected in and for each and every parish and burgh [in Scotland]. 1876 Fawcett *Pol. b. *The schoolmaster is abroad*: a saying of Ld. Brougham (see quot. 1828) which became proverbial, at first in its original meaning as expressing exulting confidence in the results of the spread of popular education, afterwards chiefly in derisive use.

Sometimes jocularly misapplied, as if *abroad* meant 'not at home', 'gone out of the country'.

1828 Brougham in *Times* 30 Jan. 3/3 Let the soldier be abroad, in the present age he could do nothing. There was another person abroad... The schoolmaster was abroad.. and he trusted more to him, armed with his primer, than he did to the soldier in full military array, for upholding and extending the liberties of his country. 1832 Praed *Why & Wherefore* in *Pol. & Occas. Quot. *c* 1460 perhaps hardly belongs here, as the poet seems to be comparing the lover's timidity in the presence of his lady to a boy's dread of his schoolmaster. The alteration in the Trinity MS. removes the awkwardness of the expression, but destroys the point.

Schooner (skū·nəɹ), *sb.*[1] Forms: 8 scooner, skooner, 8– schooner. [Of uncertain origin; recorded early in the 18th c. as *skooner, scooner*; the present spelling, which occurs only a few years later, may be due to form-association with *school*, or with Du. words having initial *sch.* The word has passed from English into most of the European langs.: Du. *schooner, schoener*, G. *schoner, schooner, schuner* (recorded 1786), F. *schooner, schoaner*, Da. *skonnert*, Sw. *skonare, skonert.*

The story commonly told respecting the origin of the word is as follows. When the first schooner was being launched (at Gloucester, Mass., about 1713), a bystander exclaimed 'Oh, how she scoons!' The builder, Capt. Andrew Robinson, replied, 'A scooner let her be!' and the word at once came into use as the name of the new type of vessel. The anecdote, first recorded, on the authority of tradition, in a letter of 1790 (quoted in Babson *Hist. Gloucester*, p. 252), looks like an invention. The etymology which it embodies, however, is not at all improbable, though there seems to be a lack of evidence for the existence of the alleged New England verb *scoon* or *scun*, 'to skim along on the water'. Cf. Sc. (Clydesdale) *scon*, 'to make flat stones skip along the surface of the water', also *intr.* 'to skip in the manner described' (Jam.). The early examples afford strong ground for believing that the word really originated about 1713 in Massachusetts, and probably in the town of Gloucester. The evidence of two or three old prints seems to prove that the type of vessel now called 'schooner' existed in England in the 17th c., but it app. first came into extensive use in New England.]

1. A small sea-going fore-and-aft rigged vessel, originally with only two masts, but now often with three or four masts and carrying one or more topsails.

The rig characteristic of a schooner has been defined as consisting essentially of two gaff sails, the after sail not being smaller than the fore, and a head sail set on a bowsprit.

b. Contradistinguished from *art*: see Art *sb.* 8.

The distinction as commonly apprehended is that a science (=ἐπιστήμη) is concerned with theoretic truth, and an art (=τέχνη) with methods for effecting certain results. Sometimes, however, the term *science* is extended to denote a department of practical work which depends on the knowledge and conscious application of principles; an *art*, on the other hand, being understood to require merely knowledge of traditional rules and skill acquired by habit.

b. with defining word.

The many conflicting systems proposed in recent times for the classification of the sciences, and the need frequently arising (apart from any formal classification) for a common designation applicable to a group of sciences that are related by similarity of subject or method, have given currency to a large number of expressions in which the word *science* is qualified by an adj. The application of these collocations, so far as it is not obvious, is explained under the adjs. Among the most prominent of the adjs. designating particular

classes of sciences are: *abstract, concrete, biological, descriptive, exact, experimental, historical, mathematical, mechanical, moral, mixed, pure, natural, physical.*

1795 BURKE *Let. to Earl Fitzwilliam* Wks. IX. 1, I am not sure, that the best way of discussing any subject, except those, that concern the abstracted sciences, is not somewhat in the way of dialogue.

6. The kind of knowledge or of intellectual activity of which the various 'sciences' are examples. In early use, with reference to sense 3: What is taught in the schools or may be learned by study. In mod. use chiefly: The sciences (in sense 4) as distinguished from other departments of learning; scientific doctrine or investigation. Often with defining adj as in 4 b.

In the 17th and 18th c. the notion now usually expressed by *science* was commonly expressed by *philosophy*.

Scientific (sai,ɛnti·fik), *a.* and *sb.* [ad. late L. *scientificus*, f. *scient-em*, pr. pple. of *scīre* to know (or perh., less regularly, f. *scienti-am* knowledge: see SCIENCE) + *-ficus* making, f. *facĕre* to make. Cf. F. *scientifique*, Sp. *cientifico*, Pg., It. *scientifico.*

The ultimate source of the word is to be sought in Aristotelian expressions like that in *Post. Anal.* I. ii. 71 b), where it is said that unless certain essential conditions are fulfilled, a syllogism will not be demonstrative, 'for it will not produce knowledge' (οὐ γὰρ ποιήσει ἐπιστήμην), rendered in the translation attributed to Boethius 'non enim *faciet scientiam*'). In pursuance of the suggestion of this phrase, the translator in the same chapter renders συλλογισμὸν ἐπιστημονικὸν by 'syllogismum epistemonicon, *id est facientem scire*', and in I. vi. uses 'scientificæ demonstrationes' for αἱ ἐπιστημονικαὶ ἀποδείξεις. In this application the word survived in Latin text-books of logic down to Aldrich, though some of them have instead *scientiam parens* or *faciens scire.*

From having been thus employed as a contextual interpretation of ἐπιστημονικός (pertaining to science or knowledge; = med.L. *scientialis*), the L. *scientificus* was afterwards used inappropriately (instead of *scientialis*) in the 13th c. translation of Aristotle's Ethics (VI. i. § 6) to render this Gr. word where it designates the theoretic as opposed to the deliberative faculty of the soul. This use was followed by Aquinas; it is in this application that the It. *scientifico* is used by Dante, and the F. *scientifique* by Oresme (14th c.). Hence the prevailing sense of the adj. in subsequent Latin, in the Rom. langs., and in English, has been 'pertaining to science'; it is merely by a contextual accident that in phrases like 'scientific investigation' the word admits of being interpreted in its etymological meaning. Aquinas also uses *scientificus* for 'expert in science, learned', a sense which still survived in 16th c. Latin. The lateness of the first appearance of the word in English is remarkable.]

The last sense, rare in the simple vb., is prominent in most of the compounds (as *abscīdĕre, concīdĕre, incīdere, excidĕre*); hence the late L. use of *cīs-* instead of *cæs-* in derivatives related to this sense.

The spelling with *sc*, first found in the 16th c., appears to be due to etymologizing confusion with L. *scissor*, agent-n. f *scindĕre* to cut, split, rend. (Cf. also *scythe.*) There appears to be no evidence of this confusion at an earlier date, though in Eng. mediæval documents *scissor* (written also *cussor, cisor*) was the usual Latin word for a tailor.]
